## INTRODUCTION

Yuki Network Token is a cross-chain EVM-compatible token which is used for Yuki Network Ecosystem.

Yuki Network Ecosystem includes a launchpad for defi projects, a swap for token trading (DEX) and a cross-chain bridge service for transfer tokens with chains.

## TOKEN INFORMATION

### Binance Smart Chain

Token Name: Yuki Network Token

Token Symbol: YUKI

Decimals: 3

Initial Supply: 100,000

Maximum Supply: 1,000,000

## Ethereum Chain

Token Name: Yuki Network Token

Token Symbol: YUKI

Decimals: 3

Initial Supply: 100,000

Maximum Supply: 1,000,000

## ECOMONY

All the chains for initialization

## Burn Policy

We plan to burn the tokens every 3 months. We will burn spare tokens only which means we won't burn your holdings.

The burn will be planned when supply is over 500,000 YUKI on each chain.

Each burn will burn no more than 10.000% of the supply.

### Mint Policy

We will mint tokens due to the marketing changes every 3 months. The tokens will not be added into the liquid pool when tokens are minted.

### Liquid Pool Policy

We will add tokens into the pool when the price is too low.

We will pull tokens out of the pool when the price is too high.

The pool changes every 3 months when the change is necessary.

### Announce Policy

Before the following transaction is proceed, we will publish an announcement on official website, twitter, telegram groups:

1. Burn or mint tokens
2. Liquid pool changes
3. Contracts for Ecosystem published or updated

## IDO AND ICO POLICY (BINANCE SMART CHAIN ONLY)

### Private IDO
